Health Sciences Center – CCS
Clinical care in Nursing and health Postgraduate Program

PUBLIC NOTICE No.37/2019

MASTER-CLASS SELECTION 2020

The rector of the State University of Ceará (UECE), Prof. Dr. José Jackson Coelho Sampaio, in the use of its statutory and regimental attributions, makes public the opening of this public notice for inscriptions for selection, at Master's level, to the **Clinical care in Nursing and Health Postgraduation Program (PPCCLIS). 22 (twenty-two) vacancies will be offered, distributed in the two research lines of the program:**

- 1- **Fundamentals and practices of clinical care in nursing and health;**
- 2- **Policies and management for clinical practice in nursing and health;**

The program aims to train researchers for the development of professionals in the field of clinical care in nursing and health and qualify professors to work in higher education in the area of nursing and health.

1. Registrations

Venue: Secretariat of the postgraduate program in clinical nursing and health care.

Address: Av. Dr. Silas Munguba, 1700 – Itaperi Campus, CEP: 60714-903 – Fortaleza-CE.

Information: Phone: (85) 3101.9823, e-mail: secretaria.ppcclis@uece.br, Website: www.uece.br/ppcclis.

Period: July 15th to August 30th, 2019

Schedule: Monday to Friday, from 8a.m. to 12a.m. and from 1:30p.m. to 5:30p.m.

Remarks:

The documentation required for registration must be delivered within a single envelope, consisting of a signed identification label, glued to the front, the model of which is in **Annex 1**. Entries sent BY SEDEX should have two envelopes, the external being addressed to the Clinical care in Nursing and Health Postgraduation Program and the other sealed and with the aforementioned label.

The candidate residing outside Fortaleza may register by public proxy or perform the registration by mail (via SEDEX) posted in the Post office, until **August 30th, 2019**.

The selection will be made by research line and by Advisor. Each applicant must register for one of the research lines of the program and for the intended advisor, presenting a research proposal related to the subject of the advisor.

Acceptance of the application is conditional on the submission of all the following documents, in a printed form. In the absence of one of the documents, the application for registration will be rejected. It is recommended that the documents be arranged and bound in the order described below:

- a) Application form, available on the website of PPCCLIS on the Internet <http://www.uece.br/ppcclis>, with the indication of an advisor among the professors of the program and accompanied by two recent 3x4 photos;
- b) Original voucher for payment of the registration fee, in the amount of R\$150.00 (one hundred fifty reais), paid in any agency of Banco do Brasil, in the Current Account No. 26038-X, agency 008-6; By deposit or bank transfer in favor of *Stricto Sensu/IEPRO/UECE*;
- c) Copy of the identity card, driver's license or work card and CPF;

- d) Copy of the updated *Curriculum vitae*, in the Lattes model, accompanied by copies of the evidentiary documents;
- e) Copy of the Diploma of the Graduation course, declaration of degree, or statement of concludent, or even of possible conclusion of full graduation course in that semester, with prediction of completion until the date of the first registration in the PPCCLIS;
- f) Copy of the school history of the undergraduate course;
- g) Copy of the National Register of Foreigners (RNE) and proof of proficiency in Portuguese (CELPE-BRAS) for foreign candidates;
- h) Original statement of time availability to devote to the course, provided by the employment institution, or hand-written statement, by the applicant, in case there is no employment bond;
- i) Copy of proof of English language proficiency issued by public educational institutions of the State of Ceará, if the applicant has it.
- j) Pre-project thesis in three (03) copies: One copy with the data identifiers of the pre-project (pre-project title, specifying the line of research, the advisor and their respective theme and **with** identification and Signature of the author) and two copies with only the data identifiers of the pre-project (title of the pre-project, specifying the line of research, the advisor and their respective project **without** identification and signature of the author).

Authentication will be required only in cases of submission of the documentation via Sedex; In the presential inscriptions, there will be the conference between the copies presented and the original documents, after which, the envelope will be sealed.

2. Vacancies

In this public notice, the program offers 22 vacancies for the master's degree, 19 for nurses and 03 for other health professionals, distributed **in two lines of research** and Advisors' projects, as shown in the table below.

The vacancies will be distributed according to the thematic fields of research, among the permanent professors of the program, according to the presentation of table 1.

Table 1 – Distribution of vacancies, according to research lines and advisors.

| RESEARCH LINES | PERMANENT LECTURER/THEMATIC FIELD | NURSING | HEALTH |
|----------------|--|---------|--------|
| 1 | Ana Ruth Macedo Monteiro Clinical care of nursing and mental health during childhood, adolescence and in the family. | 1 | - |
| | Dafne Paiva Rodrigues Social representations of nursing care and its applicability in the context of pregnancy, childbirth and postpartum. Technologies of clinical nursing care and maternal health: production, validation and application. | 1 | - |
| | Edna Maria Camelo Chaves Production of nursing care technologies in the health of children and adolescents. | 1 | - |
| | Karla Correa Lima Miranda AIDS, subjectivity and vulnerabilities. | 1 | 1 |
| | Lia Carneiro Silveira Psychoanalysis and Health: interfaces in the subject's clinic. | - | 1 |
| | Lúcia de Fátima da Silva | 1 | - |

| | | | |
|--------------|--|----------|---|
| | Theoretical, methodological and technological processes for clinical nursing care directed to people with cardiovascular disease. | | |
| | Maria Célia de Freitas Social representations and practices of clinical nursing care to elderly people. Nursing languages in clinical and educational nursing care to elderly people. | 1 | 1 |
| | Rhanna Emanuela Fontenele Lima de Carvalho Patient safety and clinical nursing care technologies. | 1 | - |
| | Vera Lúcia Mendes de Paula Pessoa Clinical care in heart disease. Palliative care in the different vital cycles, interventions for symptom management and professional qualification. | 1 | - |
| 2 | Consuelo Helena Aires de Freitas Management of integral care to adult health in chronic conditions in the perspectives of the expanded clinic. | 1 | - |
| | Lucilane Maria Sales da Silva Administration and management of work and of clinical care of nursing and health. | 2 | - |
| | Maria Lúcia Duarte Pereira Social representations, risk and vulnerability of infectious diseases. Epidemiology and clinical care of infectious and parasitic diseases. Technology and innovation for clinical care of infectious and parasitic diseases. | 1 | - |
| | Maria Rocineide Ferreira da Silva Clinical nursing care in primary health care. Health Promotion and management of clinical care in situations of vulnerability. | 1 | - |
| | Maria Veraci Oliveira Queiroz Technology and management for clinical care to adolescents. | 1 | - |
| | Paulo César de Almeida Quantitative analysis in epidemiological studies of clinical nursing and health care. | 1 | - |
| | Raimundo Augusto Martins Torres WEB Care: Youth, technologies and gender. Clinical and educational care of nursing and health. | 1 | 1 |
| | Sawiori de Jesus Silva Bezerra dos Anjos Nursing care and health in sexual and reproductive health. | 1 | - |
| | Shérida Karanini Paz de Oliveira Technologies and safety for nursing and health care. Clinical Nursing and Health Care for Diabetes mellitus. | 1 | - |
| Total | 18 | 4 | |

3. The selection process

The selection of candidates will be made by groups of Professors, denominated selection committees, one for each line of research at each stage of the selection. The selection committees will be designated by the Postgraduate Commission of the PPCCLIS.

The selection process comprises 04 (four) Steps: 1) curriculum analysis; 2) written test of specific knowledge regarding the area of concentration and the research line of choice of the candidate; 3) Evaluation of the pre-project of research; 4) Interview.

All stages have an eliminatory character.

3.1. Curriculum Analysis

In this stage, we evaluate

Academic and Research training, involving a postgraduate scholarship, residency in the health area, specialization in the field of health, scholarship (IC, pet-MEC, pet-health, monitoring, extension and technical support), Participation in a research group registered in CNPq/participation in research, courses in the area of health with workload equal to or greater than 40 hours and less than 80 hours, courses in the area of health with workload equal to or higher than 80 hours and less than 120 hours; And courses in the area of health with a workload equal to 120 hours; Participation in the Academic Center Board.

Experience of teaching/service involving teaching of high and technical schools in the field of health, teaching of higher education in the field of health, preceptorship of internship and residence, participation in an Examining Board for an end of course paper of a graduation course, participation in an Examining Board for an end of course paper of a specialization course, participation in a Committee for evaluation of works in events, orientation for completion of graduation and postgraduation Lato sensu end of course paper, orientation of IC, PET, monitoring and extension scholarship and activity of clinical practice and/or management in health.

Scientific production (from January 2016 until inscriptions date) articles published or accepted in QUALIS/CAPES journals from extract A to C, published in a non-indexed periodical/complete work published in Annals of National and international events with ISSN, published book with ISBN, book chapter published with ISBN, complete work published in Annals of National, regional and local events, reviewer in scientific event, participation as Lecturer in scientific events. On a scale of 0.0 (zero point zero) to 10.0 (ten point zero), the minimum score for approval for the next step is **5.0** (five point zero).

3.2. Written test of specific knowledge regarding the concentration area and the research line chosen by the candidate

The written test of specific knowledge will relate to issues relating to the concentration area of the program and to the research line of the intended applicant. In this stage, we evaluate the candidate's capacity for reflection, argumentation and synthesis, on general knowledge of nursing and health, interaction and specific knowledge of the line in which the applicant applied for, according to the bibliography suggested by PPCCLIS, in the form of text indication. The reading of these texts is recommended as a way to enable the candidate to access a theoretical framework of reference in clinical care in nursing and health. The test will consist of two questions, one of which is about general topics (equal to all lines of research) and a specific one on the chosen line. All candidates will answer the general question and a specific question of their line of research. **The test must be answered mandatorily with a blue or black ballpoint pen.** On a scale of 0.0 (zero) to 10.0 (ten), the minimum approval score is 7.0 (seven). The written test will have a duration of 4 (four) hours, and any form of consultation with materials or equipment is prohibited during its realization.

CAUTION: Upon initiation of test, no candidate may enter the room.

3.3. Evaluation of pre-project research

The pre-project to be prepared should contain a maximum of 12 pages, including pre-textual elements, introduction, objectives, method and references. In this stage, the consistency and adequacy of the proposal of the candidate to the research line of the program and the subject of the Advisor chosen by them is evaluated. The project should be built in accordance with the norms of ABNT. On a scale of 0.0 (zero point zero) to 10.0 (ten point zero), the minimum score for approval for the next step is 7.0 (seven point zero).

3.4. Interview

In this stage, the potentiality of the candidate to perform post-graduate studies is evaluated. The interview will be conducted around the pre-project of the candidate and its availability for dedication to the course. It will be submitted to the interview only the applicants who have obtained the approval in steps 1, 2, and 3 of this subsection. On a scale of 0.0 (zero) to 10.0 (ten), the minimum approval score is 7.0 (seven).

- Note:**
1. the convening of approved ones for the interview will be available at www.uece.br/ppcclis_ppcclis_uece and the secretariat of the program.
 2. the Applicant will be disqualified if missing or arriving late for scheduling.

3.5. Final classification

The final score of the candidate is the arithmetic average of the scores obtained in the evaluation of the written test of specific knowledge, the analysis of the pre-draft dissertation, the interview, and the curriculum. The final average will be expressed through a score within the numerical scale of 0.0 (zero point zero) to 10.0 (ten point zero), being the minimum score for approval in the selective process: **6.5** (six point five).

In the case of a tie in the final average, this will be resolved considering the highest score in the written test of specific knowledge. **If the draw persists, the analysis of the lattes curriculum will be considered.** If the draw persists, it will be considered the highest score in the pre-project research. If the draw persists, the highest score in the interview will be considered. If the tie still persists, the highest-aged candidate will be approved. There may be a deployment of approved candidates outside the vacancies of the initially chosen Advisor, provided that there are vacancies and acceptance by the candidate and the available Professor, regardless of the line of research originally chosen.

4. The calendar

- Registrations: from July 15th to August 30th 2019
- Release of deferred registrations: by 6p.m. of September 2nd 2019
- Request for appeal on registration rejection: September 3rd 2019
- Result of requested appeal: by 6p.m. of September 4th 2019
- Analysis of curriculum: September 5th to 12th 2019
- Release of the results of the curriculum analysis: by 6p.m. of September 13th 2019
- Request for appeal: September 16th 2019
- Result of requested appeal: by 6p.m. of September 17th 2019
- Application of Written Test: from 8a.m. to 12a.m. of September 18th 2019
- Analysis of written test: September 19th and 20th 2019
- Release of the result of the written test: by 6p.m. of September 23rd 2019
- Request for appeal: September 24th 2019
- Result of requested appeal: by 6p.m. of September 25th 2019
- Evaluation of pre-research projects: September 26th to 30th 2019
- Release of the results of the evaluation of the research pre-projects: by 6p.m. of October 1st 2019
- Request for appeal: October 2nd 2019
- Result of requested appeal: by 6p.m. of October 3rd 2019
- Release of interview schedules: by 6p.m. of October 4th 2019
- Interview of the candidates to the Master's degree: from October 7th to 9th, from 8a.m. to 12a.m. and from 1:30p.m. to 5:30p.m.

- Release of the interview results: by 6p.m. of October 11th 2019
- Request for appeal: October 16th 2019
- Result of requested appeal: by 6p.m. of October 17th 2019
- Final result of the Master's selection: by 6p.m. of October 18th 2019

5. Requirements for admission and permanence in the program

5.1. Proof of the required minimum degree

It will be necessary, as a requirement for the completion of the first registration of the PPCCLIS, the proof of degree required for the candidate approved that was still graduating during the selection. They will have their enrolment pending on the presentation of the **full graduation diploma** or statement stating the date on which the graduation occurred before the first registration in the course.

5.2. Proof of approval in English-language reading proficiency test

English reading proficiency will be required for all candidates approved in this selection process. The student who did not present a statement of reading proficiency in English, with a score equal to or higher than 7.0 (seven point zero) in the registration to the selection process must prove that proficiency in the act of the first registration in the course, or up to 06 (six) months counted from their first registration. The non-compliance of this recommendation will result in the course's shutdown penalty.

6. General provisions:

In all stages of this selection will be prohibited the use of electronic devices such as: cell phones, *i-pads*, *tablets*, *notebooks*, *netbooks* etc., except with the purpose of assisting the reading for candidates with visual impairment.

The release of the final results of each step will indicate only the registration numbers of the candidates approved, listed in numerical order of registration.

Vacancies will be filled by order of classification of the applicants, observing the limit of the vacancies offered.

The final number of approved candidates may be less than the number of vacancies established in this notice.

Requests for reviewing of tests will not be accepted; And the interposition of administrative appeal shall be made upon the delivery of a written document and signed by the applicant, presenting the justification of the application, together with the coordination of the Program within a period of up to 24 hours after the release of the result of each step.

There will be no appeal to the final result of the selection.

The approval and classification in the selection process do not guarantee the granting of any kind of scholarship or aid by the Clinical Care in Nursing and Health Postgraduate Program. When available, the grant of scholarships will be governed by the standards and criteria of the funding agencies and the program's scholarship committee.

7. Of the general provisions:

- The candidate's application will imply acceptance of the guidelines set forth in this public notice;
- There will be no obligation to fill the vacancies offered;
- The financial importance of registration in the selection process will not be returned under any alleged grounds;
- The candidate at the time of registration will receive an identification number which will be used in

the release of scores at all stages of the selection process;

- At the end of the selection process, the candidate not approved must redeem his registration documents at the program secretariat within 30 days after the selection is concluded. After that, all the material not redeemed will be discarded.
- The candidate approved in the selection process whose registration was carried out by means of a statement of prediction of full graduation course in that semester, should present the Statement of completion of the undergraduate course until the last day of the first registration of the semester in 2020.1.
- Entries which do not present the complete documentation provided for in this notice shall not be approved.
- The absence of the candidate at any stage excludes them from the selective process.
- Results will not be reported by phone or e-mail.
- It will be deemed a dropout the selected candidate who does not enroll.
- The omissive cases or unforeseen situations in this public notice will be resolved by the selection committee, heard by the Program Committee.
