CAN THE INTERNET BE BAD FOR YOU?

01 Spending your free time on the Internet
02 can be fun. You can chat, share photos with
03 friends, and play online games. But some
04 people are addicted to the Internet. They just
05 can't turn it off.

06 Being online for many hours at a time does
07 not mean you have a problem. The Internet is
08 very useful. Online, you can pay your bills, buy
09 clothes, and read the news. There are many
10 good reasons to spend time online.

11 However, people with an Internet addiction
12 are online too much. They don't spend time with
13 their friends and family. Instead, they spend
14 their time chatting with their Internet friends,
15 people they have never met in real life. Some
16 also play online games all day or night. Some
17 people with Internet addictions even leave their
18 jobs so they can spend even more time online!

19 People with Internet addictions don't just
20 go online to shop, have fun, or do work. People
21 who have this problem often go online because
22 they want to escape the stress and problems in
23 their lives. Many internet addicts stop caring
24 about their real lives and focus only on their
25 online lives.

26 One way Internet addicts can get help is
27 by using special software. This software controls
28 how much time someone can spend online. It
29 tells the computer to turn off the internet after a
30 certain amount time. This helps people focus on
31 real life. The software's goal is to teach people
32 to use the Internet for good reasons and not just
33 as an escape.
